We conducted our review in accordance with the Vietnamese Standard on Review Engagements No. 2410 - Review of interim financial information performed by the independent auditor of the entity.

A review of interim separate financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical procedures and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Vietnamese Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim separate financial statements for the period from 01 January 2025 to 30 June 2025 do not give a true and fair view, in all material respects, of the interim financial position of Vietnam Veterinary Products Joint Stock Company as at 30 June 2025 and the interim results of its operations and its cash flows for the period from 01 January 2025 to 30 June 2025, in accordance with the Vietnamese Accounting Standards, the Vietnamese Corporate Accounting System and related legal regulations on the preparation and presentation of the interim separate financial statements.

Investment in equity instruments of other entities

Investments in equity instruments of other entities include investments in equity securities where the Company does not have control, joint control, or significant influence over the investee.

Dividends and profits from periods before the investment purchase date are deducted from the carrying amount of the investment. 3. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

3.6 RECEIVABLES

- Trade receivables represent commercial receivables arising from sales transactions between the Company and independent buyers.
- Other receivables reflect non-commercial receivables that are not related to sales transactions.

The provision for doubtful debts is made by the Company for receivables that are overdue as specified in economic contracts, contractual commitments, or debt commitments, which the Company has attempted to collect multiple times without success. The overdue period of a receivable is determined based on the original repayment term stated in the initial sales or purchase contract, without considering any debt extension agreed between the parties. Provision is also made for receivables that are not yet due but where the debtor has gone bankrupt, is undergoing dissolution procedures, is missing, or has fled. The provision is reversed when the debts are recovered.

Any increase or decrease in the provision for doubtful debts at the closing date of the separate financial statements is recorded as general and administrative expenses.

3.7 TANGIBLE FIXED ASSETS

Tangible fixed assets are recorded at cost and presented in the balance sheet at the items of cost, accumulated depreciation and net book value. Subsequent expenditures after initial recognition are only capitalized if it is certain that these expenditures will increase the future economic benefits derived from the asset. Any costs that do not meet this criterion are recognized as expenses in the period in which they are incurred.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful life. Tangible fixed assets are classified by asset groups based on similar nature and purpose of use in the Company's business and production activities. The specific depreciation rates are as follows:

The cost of intangible fixed assets includes all expenditures incurred by the Company to bring the asset to its intended use. Costs related to intangible fixed assets incurred after initial recognition are recorded as expenses in the period incurred unless these costs are directly associated with a specific intangible fixed asset and increase the economic benefits derived from such assets.

The Company's intangible fixed asset is accounting software, which is amortized over a period of three years.

NOTES TO THE INTERIM SEPARATE FINANCIAL STATEMENTS (CONT'D)*(These notes are an integral part of and should be read in conjunction with the accompanying interim separate financial statements)***3. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)****3.9 PREPAID EXPENSES**

3.10 PAYABLES AND ACCRUED EXPENSES

Payables and accrued expenses are recognized as obligations arising from goods and services received that are due for payment in the future. Accrued expenses are recognized based on reasonable estimates of amounts payable.

The classification of payables into trade payables, accrued expenses and other payables is made according to the following principles:

- Trade payables include amounts payable of a commercial nature arising from transactions for the purchase of goods, services, and assets, where the suppliers are independent entities from the buyer, including payables between the parent company and subsidiaries;
- Accrued expenses include liabilities for goods and services received from suppliers or provided to customers but not yet paid due to the absence of invoices or incomplete accounting documentation.
- Other payables reflect non-commercial payables that are not related to the purchase or sale of goods and services.

Payables are monitored in detail by each counterparty and by maturity. Foreign currency-denominated liabilities are revalued by the Company at the selling exchange rate of the Joint Stock Commercial Bank for Foreign Trade of Vietnam (Vietcombank).

3.11 OWNER'S EQUITY

Contributed capital is recognized at the actual amount contributed by shareholders.

Share premium is recognized as the difference between the issuance price and the par value of shares in initial and additional share issuances, resale price of treasury shares over their book value, and the equity component of convertible bonds upon maturity. Direct costs related to additional share issuance and resale of treasury shares are deducted from share premium.

Other owners' capital is formed from retained earnings, asset revaluation reserves, and the net remaining value between the fair value of donated, gifted, or sponsored assets and the applicable tax liabilities (if any) related to those assets.

When the Company repurchases its own issued shares, the payment amount, including transaction-related costs, is recorded as treasury shares and reflected as a deduction from owner's equity. Upon re-issuance, the difference between the re-issuance price and the book value of treasury shares is recorded under "Share Premium".

3.12 PROFIT DISTRIBUTION

Profit after corporate income tax is distributed to shareholders after appropriations to reserves in accordance with the Company's Charter and legal regulations, and upon approval by the General Meeting of Shareholders.

The distribution of profits to owners considers non-monetary items within retained earnings that may affect cash flows and the ability to pay dividends, such as gains from asset revaluation contributed as capital, gains from revaluation of monetary items, financial instruments, and other non-monetary items.

Dividends are recorded as liabilities when approved by the General Meeting of Shareholders and approved by the State Securities Commission.

3. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

3.13 REVENUE AND INCOME RECOGNITION

The Company's revenue includes revenue from leasing business premises.

Revenue from rendering of services

Revenue from service transactions is recognized when the outcome of the transaction can be measured reliably. If the service is rendered over multiple periods, revenue is recognized based on the stage of completion at the reporting date. The outcome of a service transaction is determined when all of the four (4) following conditions are met:

- Revenue can be measured reliably. If the contract allows the buyer to return purchased services under specific conditions, revenue is only recognized when those conditions no longer exist and the buyer no longer has the right to return the provided service;
- There is a probability that economic benefits will flow to the Company;
- The stage of completion of the service at the reporting date can be reliably determined; and
- The costs incurred for the transaction and the costs to complete the service transaction can be measured reliably.

Finance income

Interest on bank deposits is recognized based on periodic statements issued by the bank.

Dividends and distributed profits

Dividends and profit distributions are recognized when the Company has the right to receive them from its investments. Dividends received in the form of shares are recorded only as an increase in the number of shares held, with no recognition of monetary value.

3.14 TAX AND OTHER PAYABLES TO THE STATE BUDGET

Value-added tax (VAT)

The Company declares and calculates VAT in accordance with the provisions of prevailing tax laws.

Corporate income tax

Corporate income tax (if any) represents the total amount of current tax payable.

Current income tax payable is calculated based on taxable income for the year. Taxable income differs from the net profit presented in the income statement as it excludes taxable or deductible income and expenses in other years (including carry-forward losses, if any), and also excludes non-taxable or non-deductible items.

Corporate income tax is calculated at the effective tax rate of 20% on taxable income as at the end of the financial year.

The Company's income tax determination is based on prevailing tax regulations. However, these regulations are subject to change over time, and the final determination of corporate income tax depends on the results of inspections conducted by the relevant tax authorities.

Other taxes

The Company declares and pays other applicable taxes and fees to local tax authorities in compliance with current Vietnamese tax laws.
